

This is what it takes to become an atmospheric chemist

William Apondo, 28, is an Atmospheric Chemist specialised in air quality. In 2009, he joined Jomo Kenyatta University of Agriculture and Technology to study a bachelor's degree in Biochemistry and Molecular Biology, graduating in 2013. In 2014 he studied master's in Analytical Chemistry, at Moi University. Apondo schooled at Usenge High School in Siaya County where he scored grade B- in KCSE of 2006. How did you end up in this career? I became interested in scientific research on my third year at university during my internship with the International Center for Insect Psychology and Ecology (ICIPE). <https://www.nation.co.ke/lifestyle/mynetwork/This-is-what-it-takes-to-become-an-atmospheric-chemist/3141096-5137028-vlbk82z/index.html>
